

ISO 14001 Lead Implementer Training Course

TRECERT ISO 14001 Lead Implementer is an advanced-level course designed to equip participants with the necessary expertise for leading and overseeing the implementation of an Environmental Management System (EMS) in accordance with ISO 14001 requirements. This course offers practical insights into planning, implementing, and improving an effective EMS.

TARGET AUDIENCE

The ISO 14001 Lead Implementer training course is designed for professionals responsible for spearheading the implementation and management of an EMS, including:

- Environmental Managers
- Sustainability Consultants
- Facilities Directors
- Compliance Specialists
- Environmental Engineers
- General Managers

LEARNING OBJECTIVES

- Know and understand sustainability and environmental factors, including principles, fundamental concepts, standards, best practices, and laws/regulations.
- Know and understand ISO 14001 requirements and describe their function and operation.
- Know and understand ISO 14001 frameworks and best practices, and describe their purposes and implementation methods.
- Know, understand, and be able to lead or participate in EMS implementation projects and related activities.

Know and understand how to improve your organization's environmental performance through more efficient use of resources and reduction of waste, gaining a competitive advantage.
